

Book Reviews

The Environmental Law Collaborative has once again produced a volume of contributions on a theme of vital importance. Contemporary Issues in Climate Change Law and Policy uses the IPCC's latest round of reports as the lens through which to assess the progress and trajectory of law for climate change mitigation and adaptation. The result is a collection of chapters that are remarkably diverse in coverage yet coherent and intent in focus. Topics span the waterfront from national security and water infrastructure to religious perspectives and local community action. Each chapter stands on its own as thorough, insightful, and engaging, as well as a bountiful resource of law and policy update and analysis. Unified in the book through its core theme, the authors provide much to be gained for everyone from a newcomer to the rough and tumble of climate policy to those already steeped in its discourse.
