Preface	ix
About the Authors.....	xiii
Chapter 1: Robin Kundis Craig, <i>Climate Change, Sustainable Development, and the IPCC's Fifth Assessment Report</i>	1
I. Three Models of Sustainable Development and the Role of the Environment.....	1
II. Sustainable Development and the Anthropocene.....	6
III. The IPCC, Sustainable Development, and Climate Change: The Fourth Assessment Report (2007).....	9
IV. The IPCC, Sustainable Development, and Climate Change: The Fifth Assessment Report (2014).....	13
V. Incorporating Resilience and Transformation.....	17
VI. Conclusion.....	19
Chapter 2: John C. Dernbach, <i>Creating Legal Pathways to a Zero-Carbon Future</i>	21
I. The Challenge of the Carbon Budget.....	22
II. Sustainable Development as a Framework for Addressing the Carbon Budget.....	26
A. A Decisionmaking Framework	26
B. A More Attractive Approach Than Conventional Development.....	29
III. Deep Decarbonization Scenarios	30
IV. Translating Decarbonization Scenarios Into Law	37
A. Incorporation of Backcasting Into Law and Policymaking.....	37
B. Use of Legal Scenarios	40
V. Conclusion.....	43
Chapter 3: Keith H. Hirokawa & Jonathan Rosenbloom, <i>Thinking Ecosystems, Providing Water: The Water Infrastructure Imperative</i>	45
I. Water Infrastructure and Infrastructure Accounting	49

II.	Recognizing Ecosystem Services as a Preparedness Necessity.....	53
III.	Greening the Gray: Climate Preparedness Through Ecosystem Services Implementation	57
	A. Low Impact Development.....	57
	B. Urban Forests as Water Infrastructure	59
	C. City Creation and Infrastructure Planning.....	61
IV.	Conclusion.....	63
Chapter 4: Jessica Owley & David Takacs, <i>Flexible Conservation in Uncertain Times</i>		
	I. Creating Flexible Response Tools	69
	A. Adaptive Management and Resilience	71
	B. Ensuring Performance	73
	II. Techniques and Concepts.....	75
	A. Public Trust Doctrine	76
	B. Payments for Ecosystem Services.....	78
	C. Conservation Easements.....	80
	D. Reducing Emissions From Deforestation and Forest Degradation: REDD+	86
	E. Biodiversity Offsets.....	88
	F. Debt-for-Nature Swaps.....	95
	G. Community-Based Natural Resource Management....	96
	III. A Coda on Equity	98
	IV. Conclusion.....	102
Chapter 5: Stephen R. Miller, <i>The Local Official and Climate Change</i>		
	I. Reading the Fifth Assessment as a Local Official.....	107
	II. Restricted Technical Capacities	108
	III. Ineffective Institutions for Regulating or Planning Land Use	111
	A. Overcoming Ineffective Commission and Permitting Structures	112
	B. Overcoming Ineffective Public Participation.....	114
	C. Overcoming Staff Reluctance to Engage.....	116

D.	The Fifth Assessment's Contributions	117
IV.	The Lack of Political Will	118
V.	Conclusion.....	122
Chapter 6: Sarah J. Adams-Schoen, <i>Taming the Super-Wicked Problem of Waterfront Hazard Mitigation Planning: The Role of Municipal Communication Strategies</i>		
I.	Using the Construct of "Wicked" Policy Problems to Shift Waterfront Development Policy to a New Equilibrium	125
A.	Time Is Running Out.....	126
B.	The Same Actors Both Cause and Seek to Solve the Problem.....	127
C.	Weak or Nonexistent Central Authority to Address the Problem	128
D.	Irrational Discounting of Climate-Related Waterfront Risks Pushes Responses Into the Future.....	131
II.	Coastal Cities' Commitment to Rebuild Can Reinforce Maladaptive Path-Dependent Processes and Fail to Take Advantage of a Window of Opportunity to Entrench Support for More Resilient Waterfront Policies	134
III.	Utilizing Transparent Risk Projections and Land Use Planning Processes to Expand and Entrench Support for Resilient Waterfront Policies.....	138
IV.	Conclusion.....	141
Chapter 7: Cinnamon Piñon Carlarne, <i>Effective Climate Change Decisionmaking: Scientific Consensus Plus a Hint of Religion?</i>		
I.	The Coexistence of Science and Religion.....	144
II.	Foundations of Climate Change Decisionmaking: The World According to the IPCC	146
III.	Religion and Science: Uncomfortable Bedfellows?	150
A.	Religion and Environmentalism: A Brief History	150

B.	The Papal Encyclical: The Escalation of Morality	154
IV.	Conclusion: We Are All St. Francis	163
Chapter 8:	Katrina Fischer Kuh, <i>Agnostic Adaptation</i>	167
I.	Can We Expect Agnostic Adaptation Strategies to Enhance Adaptation in Climate-Skeptic Communities?	172
II.	How, if at All, do Adaptation Policies (Agnostic or Otherwise) Influence Understanding of or Attitudes About Climate Science and Climate Mitigation?	177
III.	Conclusion.....	178
Chapter 9:	Shannon Roesler, <i>Responding to Climate-Related Harms: A Role for the Courts?</i>	181
I.	Imminent Threats and Mounting Costs in the Arctic.....	183
II.	Climate Change Litigation and the Constitutional Separation of Powers.....	184
III.	Is Climate Change Litigation Contrary to Democratic Values?	187
A.	Legal Geography: A Critical Assessment of Standing Doctrine.....	189
B.	Legal Mobilization and Social Movement Theory: Productive Possibilities	193
IV.	Conclusion.....	196
Chapter 10:	Inara Scott, <i>Promise and Peril: National Security and Climate Change</i>	199
I.	Assessing the Climate Change Impact on National and Human Security.....	201
II.	The U.S. Military and Climate.....	205
A.	The U.S. Military Plans for Adaptation.....	205
B.	The U.S. Military and Mitigation.....	207
C.	Addressing Climate Change Without Addressing Climate Change	209
III.	Conclusion.....	210
Index	213
