

"I reviewed several preparatory materials before entering law school, and *Cracking the Case Method* is by far the best! It's short, funny, and to the point. It helped me through every aspect of law school (case briefs, exams, a typical class, etc.) and eased the stressful transition. I found it indispensable during an overwhelming first week of classes, and still continually refer to it. My study time is now much more effective. I come into class feeling prepared with a good understanding of what to focus on. This book is constantly recommended by me, my classmates, professors, and other law students as the most effective law school prep guide. Don't make the mistake of thinking a few Google searches can show you everything you need to know before entering your 1L year. Take my advice, and theirs, and read this book!"

"*Cracking the Case Method* is a fantastic resource that touches on and explains every academic aspect a student needs to know in order to be successful in the first year of law school. As an incoming 1L with minimal legal experience, I felt somewhat unprepared and nervous for the upcoming year. This book's witty insights and comprehensive explanations quelled any nerves I had, helped me create a foundation of legal knowledge, and provided me with tools I still use as a 3L."

"Reading this book before my first year of law school gave me a much-needed primer into the world of legal education. If you are the first in your family to go to law school or have not worked in the legal profession before starting law school this book will help level the playing field by giving you guidance from award winning professors. *Cracking the Case Method: Legal Analysis for Law School Success* provides insight on the Socratic method, different sources of U.S. law, how to spot issues, how to create a plan of attack for exam questions, and most importantly for your first day of class... how to brief a case. You will turn back to this book many times during your first semester of law school. I cannot recommend this book highly enough to incoming 1L students."
